What is in the Box?

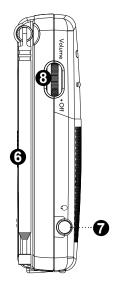

Radio, quick start guide and safety/warranty leaflet.

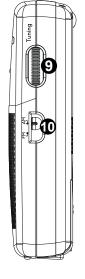

Features

- · MW (AM) / FM wavebands
- · Dial tuning system
- · Power on indicator
- · LED tuning indicator
- Carrying strap
- Headphone socket
- Batteries 2 x LR6 / AA size (not included)

Controls

- 1 Loudspeaker
- 2 Power indicator
- 3 Tuning indicator
- 4 Tuning scale
- 5 Battery compartment

- 6 Telescopic aerial
- 7 Headphone socket
- 8 Volume / On/Off control
- **9** Tuning control
- 10 Waveband switch

STEP 1 - Power your radio

Battery operation

- Open the *battery cover* on the rear of your radio by sliding the cover in the direction of the arrow.
- Insert two LR6 (AA size) batteries into the spaces in the compartment. Take care to ensure all batteries are inserted with the correct polarity as shown. Close the battery cover.
- 3 Reduced power, distortion and a stuttering sound are all signs that the batteries may need replacing.
- 4 If the radio is not to be used for an extended period of time it is recommended that the batteries are removed from the radio.

Important: The batteries should not be exposed to excessive heat such as sunshine, fire or the like. After use, disposable batteries should if possible be taken to a suitable recycling centre. On no account should batteries be disposed of by incineration.

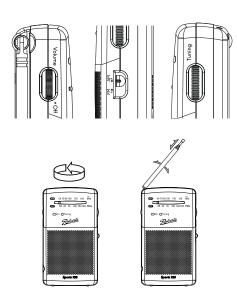

Caution: Replace batteries only with the same or equivalent type. Danger of explosion if the batteries are incorrectly replaced.

STEP 2 - Operating your radio

- Switch on your radio by rotating the Volume control clockwise until a click is heard. The Power indicator will appear.
- 2 Set the Waveband switch to the required waveband.
- 3 Adjust the **Volume control** until a hissing sound is heard.
- 4 Rotate the *Tuning control* to select the desired station. The *Tuning indicator* will light when the station is correctly tuned. On MW (AM) the tuning scale is marked in kilohertz (kHz). On FM the tuning scale is marked in Megahertz (MHz).
- 5 For MW (AM) reception rotate your radio to the position giving best reception.
- 6 For FM reception fully extend the *Telescopic aerial* and then angle and rotate for best reception.
- 7 Adjust the Volume control to the required sound level.
- 8 To switch off your radio rotate the Volume control fully anti-clockwise until a click is heard.

Note: The telescopic aerial is inoperative on MW (AM).

Safety / Warranty

General

- Your radio should not be exposed to liquids, steam, sand, dripping or splashing and no objects filled with liquids, such as vases, shall be placed on the radio.
- It is recommended to operate the product such that there is a minimum distance (10cm recommended) to adjacent objects in order to ensure good ventilation.
- The ventilation of the product should not be restricted by covering it or its ventilation openings with items such as newspapers, tablecloths, curtains etc.
- No naked flame sources such as lighted candles should be placed on the product.
- There are no user serviceable parts inside this product. Do not attempt to disassemble any part of the product.
- It is recommended to avoid using or storing the product at extremes of temperature. Avoid leaving the unit in cars, on window sills, in direct sunlight etc.
- The product must be used in a moderate climate.
- Operating temperature range +5°C to +40°C.
- Name plate is located on the rear of your radio.

IMPORTANT: Excessive sound pressure from earphones and headphones can cause hearing loss.

To prevent possible hearing damage, do not listen at high volume levels for long periods.

It is recommended that the FM band be used wherever possible as better results in terms of quality and freedom from interference will usually be obtained than on the MW (AM) band.

A 3.5mm headphone socket located on the left hand side of your radio is provided for use with headphones. Inserting a plug automatically mutes the internal loudspeaker. Please be aware that the sensitivity of headphones can vary widely. We therefore recommend setting the volume to a low level before connecting headphones to the radio. It is also recommended to reduce the volume before unplugging your headphones.

Headphone socket

Specifications

Batteries 2 x LR6 / AA size (not included)

Battery life

Other information

Approx. 60hrs of listening for 4 hours a day at normal volume using alkaline cells.

Frequency coverage

FM 87.5 - 108MHz. MW (AM) 520 - 1710kHz

Circuit features

Warranty

This product is guaranteed for twenty four months from the date of purchase by the original owner against failure due to faulty workmanship or component breakdown, subject to the procedure stated below. Should any component or part fail during this guarantee period it will be repaired or replaced free of charge.

The guarantee does not cover: 1. Damage resulting from incorrect use. 2. Consequential damage. 3. Product with removed or defaced serial numbers. N.B. Damaged or broken telescopic aerials will not be replaced under quarantee.

Procedure: Any claim under this guarantee should be made through the dealer from whom the product was purchased. It is likely that your Roberts dealer will be able to attend to any defect quickly and efficiently, but should it be necessary the dealer will return the product to the company's service department for attention. In the event that it is not possible to return the product to the Roberts dealer from whom it was purchased, please contact Roberts Radio using the contact details on the www.robertsradio.com website.

For product repairs falling outside the guarantee period, please refer to the "customer care" tab on the www.robertsradio.com website.

These statements do not affect the statutory rights of a consumer.
