

The capabilities of the Stream 107 have been enhanced since the instruction book (issue 1) was published. This document describes the new features.

### **UNDOK remote control and PIN setup**

Your radio has the option of being controlled by an application installed on an Apple iPhone, iPod touch, iPad or equivalent Android device. The remote control application is called **UNDOK**, by Frontier Silicon Limited, and is available from the Apple App Store and Google Play for your device.

**UNDOK** allows easy control of your Roberts Smart Radio. Browse internet radio stations, select DAB radio stations, control and stream your own music collection via UPnP/DLNA from a local PC, stream your favourite tracks and playlists via Spotify Connect and more.

The Now Playing screen provides radio station or media information with direct control of the radio volume. The app also allows control of multiple radios.

Your radio has a PIN number facility which allows you to ensure that your radio can only be controlled by your own device rather than someone else's.

**UNDOK** will try to use the default PIN of '1234' to control your radio.

You may change the PIN if desired using the '*NetRemote PIN Setup*' option in the *Network settings* menu. The updated PIN should then be used in the **UNDOK** app to allow the app to reconnect to the radio. The app will prompt you for the PIN as needed.

Control via the UNDOK app

**Download UNDOK** for free from the **Apple App Store** and **Google Play**.
